1. M-files

The set of the 21 short country reports has an extension of over 1,000 pages. Therefore, it has been considered most appropriate to provide access to them through M-files. This system can be accessed either through its web-site version (<https://honest.cloudvault.m-files.com>) or the mobile application (M-files application from iStore for Apple, from Google Play for Android, from Microsoft Store for Nokia and Microsoft phones).

LUT has set up an account so that the Commission services can read the reports with the following details:

- **username:** lut.read-access
- **password:** SCreport2016
